## Summary

I'm a highly experienced and results-driven ICT professional with broadband knowledge in IT methodologies and technicalities.

Throughout my experience, I have excelled in installing and configuring software and hardware, website development, managing network servers, setting up accounts and workstations as well as monitoring performance and maintaining systems according to requirements.

Some of the skills I have acquired include; system administration, network administration, troubleshooting, user support and technical support. With my progressive experience, I aim to obtain a position where my robust IT experience will be utilized in contributing to business value while leading the organization to achieve measurable business results and growth.

### **System administrator, network configuration, web developer**

Looking for a challenging role in a reputable organization to utilize my technical skills in system administration, network configuration, database skills, and Web development skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

## EXPERIENCE
